

Victor Spichenkoff Santana

FULLSTACK DEVELOPER

I have 2 years of experience in web and back-end development. I am always focused on learning new technologies and creating efficient, readable, and scalable code. At your company, I hope to contribute to the development of various solutions while growing alongside the team.

EXPERIENCE AND PROJECTS

PORTFOLIOS SHARE WEBSITE

[Visit my profile here](#)

Website with authentication, guest login and accounts
Infinite scrolling system, like ranking system, text editing, and much more!

PAGINATION TEST API

[Access documentation](#)

API that facilitates pagination testing, in a 100% flexible way
This API has more than 10 different inputs, number ordering and more. I also created a [website](#) to test easily

API THAT CONTROLS MY SERVERS

[Documentation](#)

API created to bypass spin-down of free servers
There is also a limit of 750 hours/month, so I can select one or more APIs to be active. For reporting, there is a bot on Telegram
